

Redundant Controllers are Here!

RaidWeb is pleased to announce our new line of redundant controller RAID units in Fibre & SAS...

RaidWeb is pleased to announce the introduction of our line of redundant controller RAID units. These units are available in 16 or 24 bay configurations, with total storage of up to 36 terabytes per unit. Available in 4Gb Fibre Channel or SAS interfaces. All units also accept up to three JBOD expansion units, making large scale data storage deployments simple. Our redundant controller units offer you the ultimate in data redundancy!
