

## RaidWeb 4Gb Fibre RAIDs

The RaidWeb line of 4Gb Fibre attached RAID disk arrays offers maximum performance and a rich feature set at an affordable price point. Available up to 48TB, expandable to well over 100TB per unit with economical JBOD units. Our 4Gb Fibre RAIDs offer a modular design which makes replacing power supplies, drive trays, controllers and fans quick and simple. An advanced GUI allows the user to setup, monitor and maintain units with incredible flexibility. RaidWeb offers 4Gb Fibre attached disk arrays in the following models: 24 bay dual controller, 16 bay dual controller, 16 bay single controller, 12 bay single controller.

- 4Gb Fibre hosts. Suitable for DAS or SAN applications.
- All major RAID levels supported - maximum flexibility.
- Up to a 5 year parts & labor warranty.
- Economical expansion using JBODs or daisy chain.
- Array recovery with innovative array structuring.
- VMWare certified arrays - smarter, greener storage.
- Available preconfigured up to 48TB.

The RaidWeb line of 4Gb Fibre attached RAID disk arrays offers maximum performance and a rich feature set at an affordable price point. Available up to 48TB, expandable to well over 100TB per unit with economical attached JBOD units. Our 4Gb Fibre RAIDs offer a modular design which makes replacing power supplies, drive trays, controllers and fans quick and simple. An advanced GUI allows the user to setup, monitor and maintain units with incredible flexibility. RaidWeb offers 4Gb Fibre attached disk arrays in the following models:

Janus8801 24 bay RAID with dual, redundant controllers. Storage up to 48TB, dual 4Gb Fibre hosts per controller. Accepts SAS or SATA II hard drives. Advanced GUI. VMWare certified storage. Up to 5 year warranty, battery backup available.

Janus6601 16 bay RAID with dual, redundant controllers. Storage up to 32TB, dual 4Gb Fibre hosts per controller. Accepts SAS or SATA II hard drives. Advanced GUI. VMWare certified storage. Up to 5 year warranty, battery backup available.

Janus6651 16 bay RAID with single controller. Storage up to 32TB, dual 4Gb Fibre hosts. Accepts SATA II hard drives. Advanced GUI. VMWare certified storage. Up to 5 year warranty, battery backup available.

Janus4551 12 bay RAID with single controller. Storage up to 24TB, dual 4Gb Fibre hosts. Accepts SATA II hard drives. Advanced GUI. VMWare certified storage. Up to 5 year warranty, battery backup available.
